

Talha Tariq

WEB DEV MASTERY

There are two branches of **web development**.

- **Frontend** - What you see on a live site (Design)
- **Backend** - Behind the scene process

Choose Frontend **if you Love** ❤️

- Doing Creative Design (🎨)
- Immediate visual & feedback of your development
- User Experience

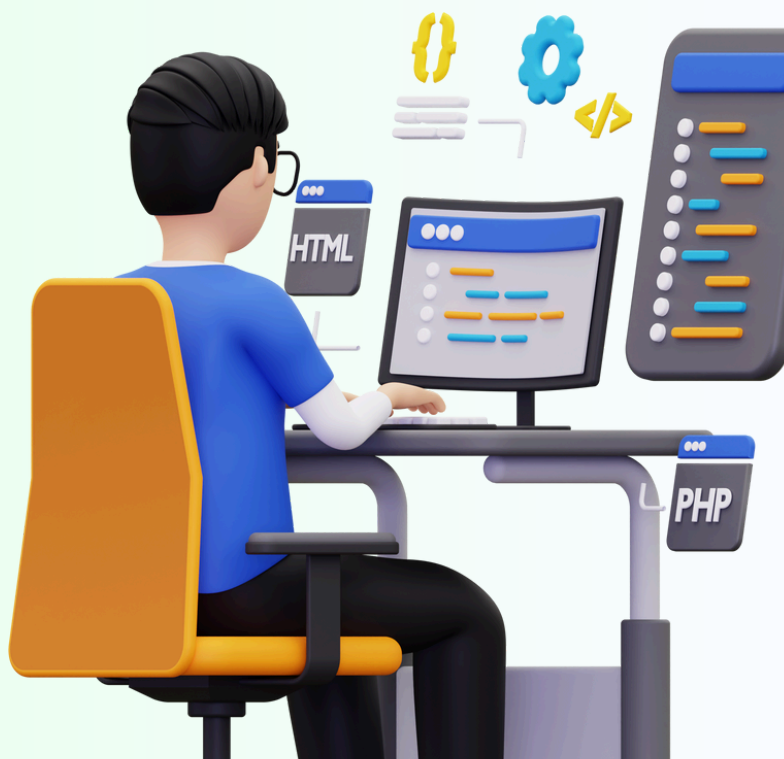

Choose Backend **if you Love** ❤️

- Problem Solving (🧠)
- Data Management
- Designing Scalable Applications

Frontend

Step 1

- Learn **HTML** for Structure of Site
- Learn **CSS** for Design
- Learn one **CSS Framework**
(Tailwind, or Bootstrap)
- Learn **Git / Github & Deployment**

Step 2

- Learn Basic **JavaScript** (Core)
- Learn **Advance JS** (AJAX, ES6)
- Make **3-5** Projects

Step 3

- Learn Basic **React** (core)
- Learn **Advance React** (Router, Redux, Hooks)
- A Component Library. (MUI, AntD)
- Make **3-5** Projects

Step 4

Learn these

- Framer Motion - Animations
- Hook Forms - Validations
- React Query - API Calling
- ES Lint / Prettier

Step 5

- Learn **NextJs**
- Learn **TypeScript**
- Make **3-5** Projects

Step 6

You're done with **frontend Development** 🎉

Let's see some of the projects to do.

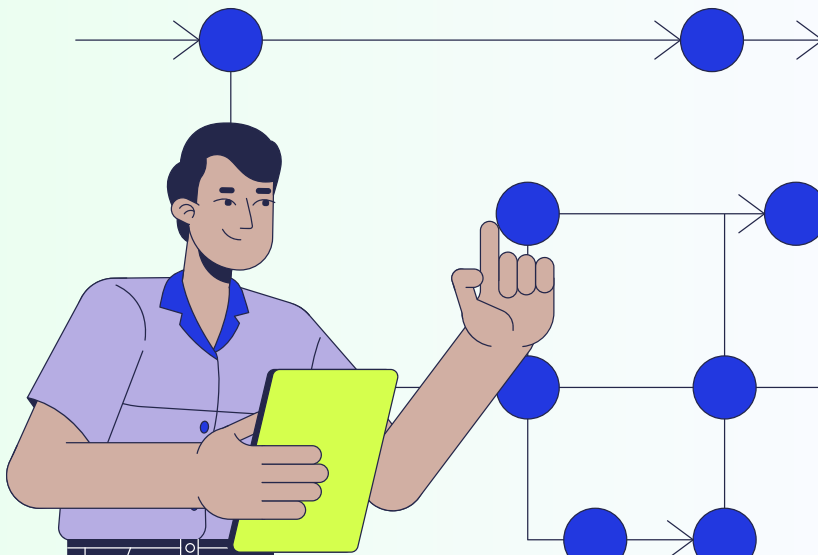

Projects

- Todo List
- Portfolio
- Travel Company
- Real Estate Site
- E-commerce Site
- Blog App
- UI/UX Landing Pages
- Job Portal

Backend

You must know basic frontend development before jumping on backend. Atleast:

- HTML
- CSS
- JavaScript

Step 1

Choose a language for backend

- JavaScript (my top fvt)
- Python
- Ruby
- Java

Step 2

As I chooses JS so,

- Learn **JavaScript**
- Learn **NodeJs**
- Learn **ExpressJs**

Step 3

Pick one of the DB of your choice:

- SQL
 - MySQL
 - PostgreSQL
 - SQL Lite
- NoSQL
 - MongoDB
 - DynamoDB

Step 4

Have expertise in:

- HTTP / HTTPS
- REST Apis
- MVC Architecture
- CI/CD

- Authentication
- Hashing
- Rating Limit
- Documentation (Swagger)
- Payment Gateways

Step 5

Learn about **Deployments**:

- Google Cloud
- AWS
- Azure
- Heroku

Project Ideas

- Social Media App
- Chat App
- CRUD Blog App
- Travel App
- E-commerce App

Finallyyyyyy

You're done with roadmap of becoming a good **web developer** to

- Landing a Job
- Start Freelancing
- Remote Contract
- Starting own Agency

If you need any help. I am just one message away on my LinkedIn.
