JOB WINNING

UPWORK

PROPOSAL TEMPLATE

Writing an effective proposal on Upwork can be the key to landing your next big project.

Here's my tried and tested **7-step formula** to make your proposals stand out and win more clients.

This is for you if ❤️

- You **never** written a proposal.
- **You don't know** how to write a good proposal.
- You spent **hundreds of connects** but not able to secure projects 😞
- You are **wasting your time and Money** especially.
- You used connects a lot, but not able to get good results.

Don't you worry 😊

Let's move towards my 7 Step Formula

7 Step

Formula

Step 1

Greetings

Always Starts with Greetings.

Hi (Client name),

You can get client name from his old reviews. (A hack that nobody will tell you 🧐)

Step 2

Hook

This step is **your hook**. When you'll send a proposal to client, only **first 2 lines** will be visible to him in the lists that he will be seeing. Client will decide there either He have to open your proposal or not.

A hook is a **compelling opening statement** or idea that grabs the reader's attention and makes them want to read more. So, use a strong hook in first two lines that can force him to open your proposal and start reading it.

If you failed to get **attention of client** in first 2 lines. Does not matter how much good proposal you've written, it will be useless and waste of money and time you spend.

An Example of hook can be 👇

Struggling with slow website load times and outdated design? I can help you transform your website into a fast, modern, and user-friendly platform.

with a best hook, clients will directly make you an offer as they used to me.

I explained in very depth how to came up with the best cook in our community sessions.

Just Drop me a message to join that community if you want as well.

Step 3

About You

Introduce yourself briefly in 1-2 lines. Highlight your experience and expertise relevant to the job.

This is where you grab the clients interest by showcasing your expertise and experience.

Step 4

Add Value

Explain how you can add value to their project.

Find **Pain Points** of user from job description and add value by solving them.

You can give solutions for these, or ask questions around these.

Do you know how to extract
pain point of client for
making solution around it?

NO?

No Worries. Join our
community and learn many
things like this.

Step 5

Portfolio

Add a link to your relevant projects or portfolio to show client that you worked on the similar things earlier too.

Step 6

CTA

Encourage the client to take the next step.

Whether it's scheduling a call or asking for more details, **make your CTA clear and compelling.**

as you gained the client interest, desire and attention.

Now it's time for his action to contact you and you've to remind him more.

Step 7

Closing

Close your proposals with professional way like thanks and your name. or regards and your name.

Example 👉

Regards,
Talha

So It is

- Greetings
- Hook
- About You
- Addition of Value
- Portfolio
- Compelling CTA
- Closing

Ending Notes

If you want to

- set a killer profile
- need my secret proposal templates.
- optimize profile with keywords
- doubling freelance income.

Then 

If you need any help. I am just one message away on my LinkedIn.
